Manual Testing
Test Case:
    1) Check response when clicking See All Bots button
       - Response should show 5 bots from shuffleArray
    2) Check response when clicking Draw button
       -Response should show 2 bots
    3) Check response when click Play Again button
       -Response should restart and let user play again
    4) Check response when clicking Dual button
       -Response should dual bots

Bug Report :
       API Server data is not pulling as expected
    1) Open vs code terminal and run nodemon server.
    2) Inspect the source and network tabs
    3) Uncaught Reference error: require is not defined
    4) Added axios middleware but browser still isn't clicking in response to buttons
       -Fix: Updated index.html script type to "module" for index.js
